HONDURAS.

Report from Puerto Cortez—Fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended October 13, 1903. Present officially estimated population, 2,125; prevailing diseases, malarial fever of mild form and intestinal diseases; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 8	Anselm	41	6	2	8
10	Espana	14	0	3	0
10	Hiram	13	0	0	0
10	Habil	15	1	0	2
11	Hypolite Dumois	24	0	0	0

INDIA.

Reports from Calcutta.

Passed Assistant Surgeon Sprague reports, September 21 and October 1, 1903, as follows: Total recorded deaths in Calcutta, India, for the week ended September 12, 1903, was 208, of which 4 were due to Asiatic cholera and 13 to bubonic plague. Neither of these diseases were considered as epidemic. None of the cases of cholera were connected with shipping. The plague cases were scattered over nine wards, and occurred among the Hindus and Mohammedans. It is now nearing the close of the rainy season, the effect of which seems to be to greatly reduce the number of cases of these diseases in this region. The average for the past five years during the corresponding period has been 5 deaths from cholera and 24 from plague.

Week ended September 26, 1903, one vessel was inspected bound for the ports of Boston and New York. Eight sailors were passed and 24 "lascars" or Indian sailors. One of the latter was rejected because of one degree elevation of temperature.

There was one passenger bound for New York. Total inspected: Thirty-three crew (1 rejected), 3 officers, 1 passenger. Total, 36.
